

Granite

The HDL Granite Panels are made of the most regular shapes, rectangles. With careful calculation on the proportion of each rectangle stripe, we make these obvious shapes a unique piece of ornament that naturally fits into your home.

Granite

Available in two sizes with three colors

Arctic silver space gray rose gold

Granite

Instinctive experience

Most of the time, when we see a metal switch, we push it to control instead of touching it. So, we make it a push-button panel.

- Premium metal finish
- Natural and comfortable push feedback
- At least 100,000 times of pushes

More intuitive, more beautiful

The status indicators and icon backlight on the Granite panels are RGB lights, which means the brightness can be dimmed to the level you want, and the colors can be changed to show different statuses.

The icons on the panels just intuitively show you what to control. Compared to engraving words on the buttons, icons make the appearance more minimal and look better.

Granite

Obviously unique

We long for beauty, which is often a common concept that humans can agree on. And we also ask for uniqueness, which we as individuals use to show our personality. But beauty and uniqueness can be perfectly combined when we make things with obvious elements.
